

Install Ai-Stream

Ai-Stream is Ai-Media's flagship software for sending live captions through our platform. You will need to install this software to send live captions to our clients.

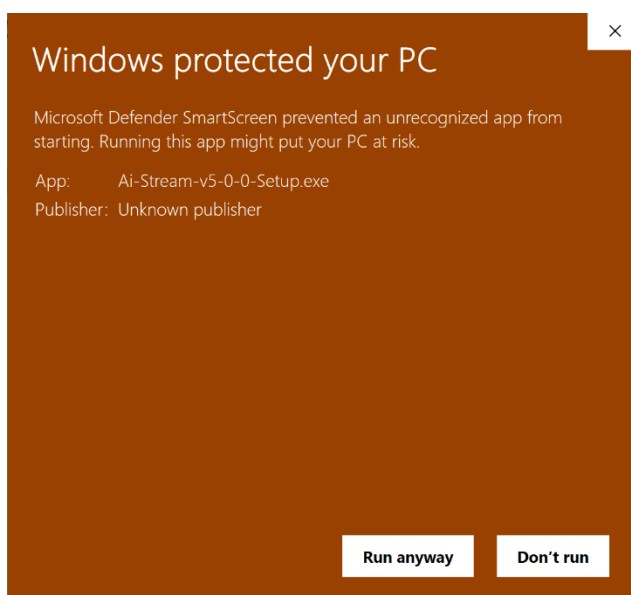

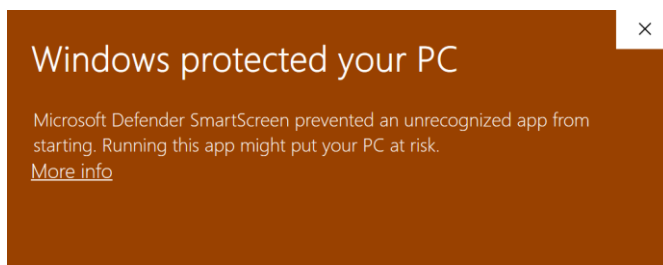

1. Once downloaded, right-click on the *Ai-Stream-Set-up.zip* file and choose **Open With > Windows Explorer**.

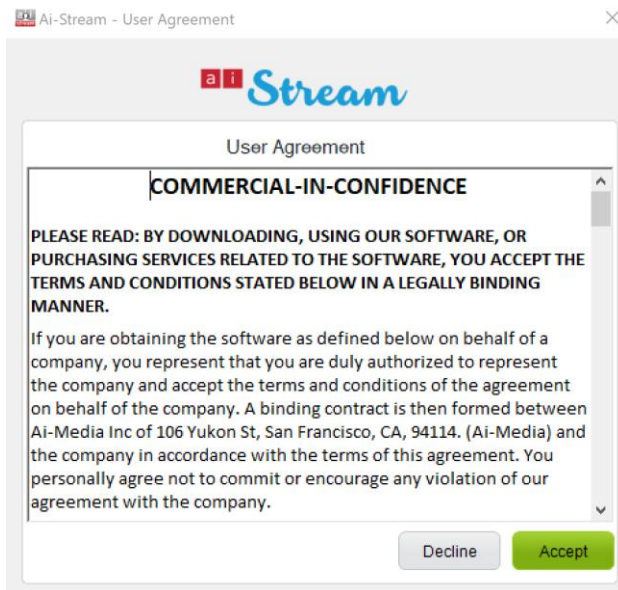

2. Double-click the Ai-Stream exe file.

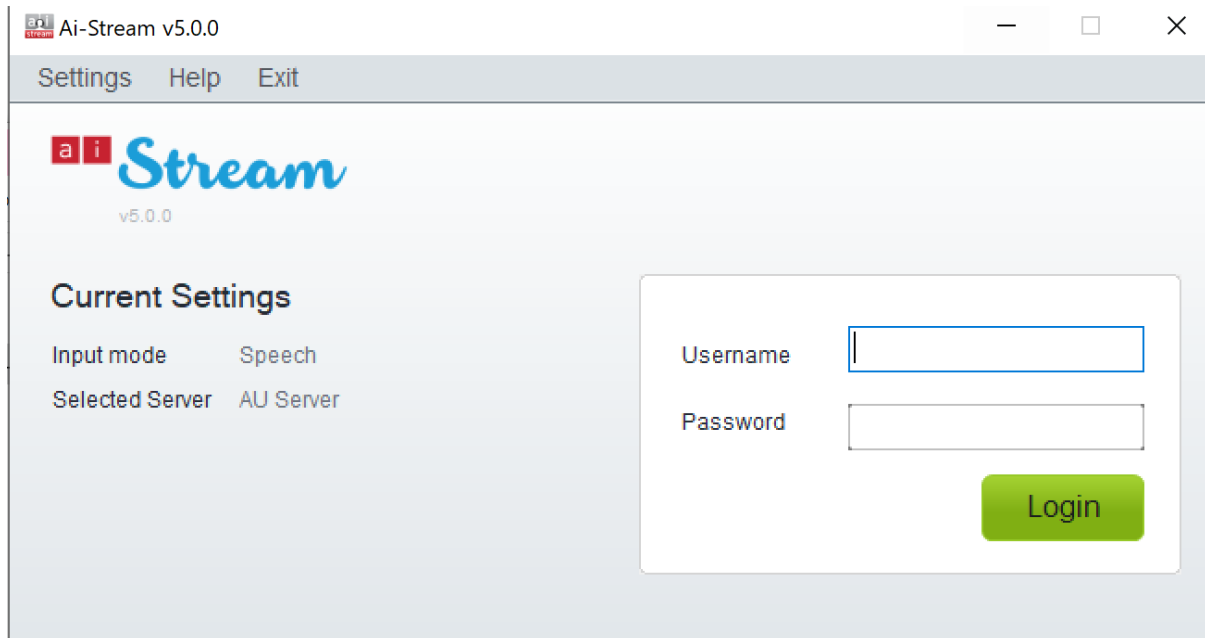

3. If this pop-up appears, click **More info** and then choose **Run Anyway**

4. Read through and click **Accept** on the User Agreement pop-up, then click **OK**.

5. After a few moments, Ai-Stream will complete the install and open ready for you to adjust the settings or log in.

Set-up Ai-Stream for Stenocaptioning a Live Streaming Session

1. Click on *Settings*
2. Select **Input Mode**
3. From the dropdown, select *Case Catalyst* as the *Input Mode*
4. Select the *Steno buffer size* to 40
5. Select the *serial port for steno input* as the other com0com port that was setup in previous steps.
6. Click *Save*
7. Select **Output Mode**
8. From the dropdown, select *Wowza* and make sure the WOWZA tick box is checked
9. Click *Save*
10. Check that your Server in Ai-Stream is correct for your region (AU, UK, US). You can change this if needed by clicking *Settings > Select Server* and using the dropdown option.
