

AI-POWERED, FAST & COST-EFFECTIVE AUDIO DESCRIPTION

LEXI AD (Audio Description) helps video content owners expand audience reach and accessibility by making audio description faster, more affordable, and scalable. Unlike traditional human-generated workflows, LEXI AD reduces costs and turnaround times while enabling large-scale delivery.

Traditional human-generated audio descriptions are costly and time-intensive, limiting their feasibility for many organizations. Lexi AD revolutionizes the process by delivering automated, precise, and efficient audio descriptions up to 75% faster than manual methods - at a fraction of the cost.

Benefits

- Affordable & Scalable**
 Reduce costs while generating audio descriptions with minimal effort.
- Fast Turnaround**
 Receive descriptions up to 75% faster than manual methods.
- Seamless Integration**
 Connect via API, S3, or FTP for bulk processing with minimal effort.
- Flexible & Customizable**
 Choose from multiple narration voices (US/UK/AU, male/female), set pacing speed, and provide video intros or guidelines for tailored narration.
- Secure, Self-Service Platform**
 Manage projects easily via a cloud-based interface.
- Smart Timing Control**
 Fine-tune overlaps, silence detection, or enable continuous AD across full video.

Who Can Benefit?

- 
Broadcasters & Content Creators
 Make your content accessible to all.
- 
Government, Education & Enterprise
 Enhance accessibility, improve engagement, and meet WCAG / ADA Title II compliance.
- 
Digital Archives
 Make your content searchable and unlock valuable insights with AI-generated descriptions.

Advanced Customization

Unlock with a single toggle - and take control of your audio descriptions.

- Choose narration voice & pacing
- Add video introductions for context
- Apply audience-specific guidelines
- Fine-tune timing & output options
