SECURE GEN AI FOR SMARTER BUSINESS DECISIONS

Discover How LEXI AI Can Transform Your Business Intelligence & Decision-Making

LEXI AI is an enterprise AI solution, developed with BrewAI, that securely integrates advanced AI models with proprietary data. Powered by BrewAI's custom LLM stack, it outperforms systems like ChatGPT in many tasks and reduces hallucination risk. Running behind firewalls, LEXI AI provides real-time insights and automation with full privacy and security.

✓ **Scalable & Cost-Efficient**
Optimized for business needs while reducing unnecessary AI costs.

✓ **Proven AI Technology**
Backed by AI-Media's trusted platform for secure and reliable AI deployment.

✓ **Reduced Hallucination**
Minimizes false outputs and inaccuracies, based on cutting-edge academic research.

✓ **Deep Reasoning with Citations**
Explains how conclusions are reached with clear, pinpointed citations for transparency & accuracy.

✓ **AI That Works for You**
Combines the strengths of public GenAI models with the security of private enterprise data.

✓ **Seamless Integration**
Embeds smoothly into existing business workflows, enhancing productivity.

✓ **Enterprise-Grade Security**
Operates behind company firewalls, ensuring full data control and privacy.

✓ **Unlocks Internal Knowledge**
Leverages proprietary data to generate actionable insights without external risk.

✓ **Hybrid Cloud & On-Premises**
Supports cloud and on-premises setups for maximum flexibility.

✓ **Quality Ingestion for Visual Documents**
High-accuracy processing & insight extraction from visual documents like PDFs
How It Works

Integrate
Connect your proprietary data with LEXI AI.

Scale
Expand effortlessly as your business grows.

Unlock Potential
Maximize efficiency with LEXI AI.

Generate Insights
AI-driven analysis & real-time predictions.

Automate
Streamline workflows and decision-making with automated insights.

Enhance your business operations with LEXI AI.
